LET'S SAVE THE EARTH

Ninety-seven percent of climate scientists agree that climate change is due to human activities, and most of the leading scientific organizations worldwide have supported this position. Apart from reducing the burning of fossil fuels for electricity, heat or transport, we must take care of the environment. What can we do about it?

- As most of the Earth's water is salt water and only three per cent is fresh water, we must save this. You can have showers instead of baths. Be aware that every time you leave a tap running, about 60 litres of water is wasted.
- Because our electricity is generated by nonrenewable energy sources it causes a lot of pollution. Don't keep your TV or your electronic devices on if you aren't watching or using them. Make sure that you turn off the lights when you don't need them.
- Don't use lots of plastic bags. They don't decompose, so most of them will be unchanged 100 years from now. Americans use 100 billion plastic bags a year, which need 12 million barrels of oil to manufacture. Plastic kills hundreds of different species such as birds, fish or turtles.
- Keep the country clean. Wild animals and birds are often killed by rubbish when they eat pieces of metal from cans; others are hurt by broken bottles.
- Have in mind the Three R's motto: "Reduce, reuse, recycle". According to Greenpeace, we should add other 6 R's: repair, remake, refuse (unnecessary products or single-use items), remember (to reuse), respect and restore.

Adapted from the Internet

1. Read the text and answer these questions with full sentences. (2 marks)

1. Who thinks that human activities are responsible for climate change?
2. How can we save water?
