Chocolate

I know that I have a problem – a big problem. It may sound funny but it is very bad for my health and for my life. What is the problem? I can't stop eating chocolate!

I started eating chocolate as a child. Me and my sisters all ate a lot of different kinds of chocolate. However, my sisters and I are adults now and I'm the only one who still eats it a lot. My elder sister can have a bar of Toblerone and make it last a week. My younger sister is happy with one box of chocolates a year for Mother's Day. My parents don't eat any chocolate at all. Me – I need it every day, and lots of it, too.

So, how much do I eat? Well, I have about 10 bars of chocolate a day. My first bar is at 8 o'clock in the morning, and then I have my last one just before I go to bed. Sometimes if there is no chocolate in the house, I drive to the nearest shop that sells it (about 2 kilometres away) and buy some more. I even drive out late at night if I need some chocolate. If the children (and this is terrible, I know) have chocolate in the house, I take it. When Sarah was eight someone gave her a box of chocolates for her birthday. I took the box and then, when she was out playing, I ate some. Then I ate some more. I finished the whole box! A few days later she said, "Where's my box of chocolates?" and I said, "I don't know". I know that was very bad.

What can I do? Even at night I dream about chocolate. My favourite dream is falling down a hole and landing on a big pile of chocolate bars! I really do want to stop, or start to eat less. At the supermarket there is always chocolate for sale while I wait to pay for my shopping. At the station (bus, train, underground...) there is always chocolate for sale in machines. Everywhere I look there is chocolate for sale! I try to speak to my family but nobody understands. They all like chocolate but nobody wants to eat 10 bars a day, and nobody understands why I do. I need help!
